

## Year 11 transition tasks for Year 12 starting in September 2021

There are 2 activities that you can be getting on with that will help ease you into the start of your A-level Physics course.

1) IsaacPhysics. This is an online multiple choice questioning website that we use for some homeworks. It does require you to perform some working out to find out the answer so we suggest that you start a file or book where you keep all of your working out. This will help you get used to completing homework tasks

To access this you will need to:

- Go to [www.isaacphysics.com](http://www.isaacphysics.com)
- Sign up to an account
- When asked for a code to link up to an account you will need to add "Z4X7QT"
- This will lead you to an account set up by Dr McMahon. She will be able to oversee how you are progressing with each task. Every time a new assignment is added you will get a notification to your email address. There should be some assignments already set up on there.

2) PiXL gateway tasks. Read through the booklet and attempt what you can. There are also some suggestions for wider reading and films that might be of interest to you as well. If you decide to do some further reading/watch relevant films then make some notes on what relevance that you think it has to Physics. (It doesn't have to be an essay but just some reminders as to what it was that you read/watched in case you are asked to discuss what you 've done).

We look forward to seeing you in September 2021!
