## About the project

A project to allow our students in Spain and England (UK) to find out more about each others' daily lives. The students will write to each other in English and Spanish and will use the Twinspace to upload presentations about themselves, local area, daily lives, festivals and local culture.

### AIMS

To strengthen intercultural awareness and promote understanding of daily lives in countries different to our own.

To allow students to participate in real life exchanges in the target language in order to allow them to see the purpose of learning a foreign language.

To make friends with teenagers of similar ages in Spain and England.

### WORK PROCESS

We will exchange emails, traditional letters or postcards, all students will have a specified pen friend that they will write to.

The students will write to each other in English and Spanish and will use the twinspace to upload presentations about themselves, their houses, local area, daily lives, festivals and local culture.

### EXPECTED RESULTS

To improve students motivation in learning a foreign language by enabling them to have a purpose for their language learning.

To see improved intercultural understanding and see students become more interested in how others live.

To enable students to improve their language skills through real life communications.
