- Understand the impacts of digital technology to individuals and wider society.

L05-8 (Autumn Term)

L05-8 (Spring Term)

L01-4 (Autumn / Spring Term)

Knowledge
(facts, information, concepts and key terminology)

- Students will undertake a practise project which covers all practical elements of the course.
- In addition to content delivered in year 10, the following is covered: presentation techniques, iterative review of the project and evaluation.

- NEA takes place this half term.

- Should any students re-sit the exam, content from LOs 1-4 will be re-taught through the year.
- The content addressed will depend on question-level analysis from

Understanding
(ability to connect and synthesise knowledge within a context)

- Combining all practical elements of the course in a practise project.

- Combining all practical elements of the course in a board-set assignment (NEA).

Skills
(successful application of knowledge and understanding to a specific task)

- Application of practical skills in a practise project.

- Skills from LOs 5-8 are applied this term.

Formal Assessments
(those done by all/vast majority of the cohort)

All work from this practise project marked to help students improve for the NEA in the Spring Term.

NEA

Mock exam will take place March for those who will resit the examined unit.
