

## **Year 11-12 Transition work**

Over summer you will be expected to utilise the foundations from GCSE as well as building on this knowledge through research in preparation for A-Levels.

You must research the body systems from the knowledge organiser and fill in the gaps. Once completed, use this acquired knowledge to answer the exam questions for each topic area.

By completing this work, you will be giving yourself a head start going into A-Levels as well as developing the necessary independent research skills needed for the course.

You should allocate up to 2 hours researching and completing the knowledge organiser and 2 hours to complete the questions.
